i'm a truckdriver and these channels help me out more than the local radio or tv stations do when i go to these citys to deliver my load, if there is a delay and i can hear about it in advance then i can choose another route to safely deliver this load or be out of the way of the problem or even to help other drivers avoid the problem area if u take this away u are endangering the safty of not just me but everyone else around me or any other big truck who has xm radio and uses these channels please don't ruin a good thing going
